

Linx 10 Printer - Like No Other in its Class

LINX

The Linx 10 is a Continuous Ink Jet (CIJ) Printer

Why choose a CIJ Printer? Because CIJ printers can:

- ✓ Print onto products as they move on the production line
- ✓ Print onto products without any contact (so they can code onto curved surfaces and irregular shapes)
- ✓ Print onto almost any porous or non-porous surface with inks that dry quickly

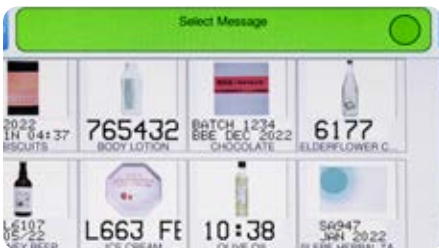

Hassle-free

Affordable

Reliable

'Fit and forget' printing solution, automatic printhead cleaning, automatic adjustment to changing temperatures and long filter change intervals

Easy to set up with on-screen guides, a choice of accessories and a simple set up on the line

Intuitive user interface colour touch screen, easy to understand icons and unique code selection using product images

Low initial cost without the cost or complication of a 'one size fits all' printer

Low installation cost, it can be placed on any level surface or fixed directly to your line, ideal where space is limited

Low running costs, saving you up to 20%* on solvent usage*, and reduce ink usage by up to 30%*, and self-service is quick and easy

A stainless-steel enclosure and IP55 rating, and a sealed and adjustment-free printhead requiring **minimal cleaning**

Simple, one-touch, fluid cartridge refills during printing, no mess, no tools, no mistakes

Linx PrinterNet enabled IIoT solution gives you control of your production line and remote technical support providing fast fault resolution and advice

Why choose the Linx 10?

- ✓ Compared to other printers, the Linx 10 provides a more affordable, reliable and hassle-free printer
- ✓ It will print up to three lines of dot matrix text, including dates, times and number sequences
- ✓ It can print logos, with an enhanced option to print barcodes too
- ✓ It can print these with black fast drying inks, including an MEK-free ink

Linx 10 Printer - Like No Other in its Class

Printing capability

- Prints up to 3 lines of text, symbols and numbers (with an option to print barcodes)
- Bold character printing
- Upper-and lower-case text
- Rotated character (tower) printing
- Variable character height and width
- Code height range from 1.8mm to 8.8mm (with an option to print 20mm high for carton coding)
- Line speeds up to 2.66m/s
- Choice of MEK-free and MEK base black inks for coding onto most dry products/packaging

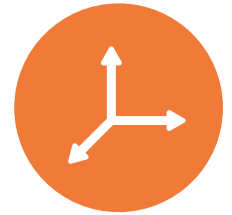

Programming features

- Colour, touch screen with clear icons for code setup and selection
- Live message preview
- Image-based message selection
- Single touch print start, pause and printer shutdown
- Password protected functions with customisable user profiles for secure, mistake-proof operation
- Message store and printer settings back up, copy and restore using USB storage device
- Simple line speed setup wizard, for quick installation onto new lines

Physical characteristics

- Weighs only 11kg
- Stainless steel enclosure
- IP55 rating (washdown)
- 7" back-lit full colour touch screen with tough polymer cover
- Flexible and durable conduit, solvent resistant
- Mounting options – direct mount onto line, trolley, bench or table
- Carry handle and printhead dock for safe movement between lines
